Red Hat Certified Engineer

EXAM OVERVIEW

The performance-based Red Hat Certified Engineer (RHCE) exam for Red Hat Enterprise Linux 8 (EX294) tests your knowledge and skill in managing multiple systems using Red Hat® Ansible® Engine and executing common system administration tasks across a number of systems with Ansible. The skills tested in this exam are the foundation for system administration across many Red Hat products.

By passing this exam, you become a Red Hat Certified Engineer. If you choose to continue your learning journey beyond RHCE®, the credential can also serve as a foundational step on your path toward our highest level of certification—Red Hat Certified Architect.

This exam is based on Red Hat Enterprise Linux® 8 and Red Hat Ansible Engine 2.8.

Red Hat

RH294- Red Hat Linux Automation with Ansible

Red Hat Linux Automation with Ansible (RH294) teaches the skills needed to manage large numbers of systems and applications efficiently and consistently. You will learn the techniques needed to use Ansible® to automate provisioning, configuration, application deployment, and orchestration.This course is based on Red Hat® Enterprise Linux® 8 and Red Hat Ansible Engine 2.8.

- Deploy Ansible
  - Configure Ansible to manage hosts and run ad hoc Ansible commands.
- Implement playbooks
  - Write a simple Ansible Playbook and run it to automate tasks on multiple managed hosts.
- Manage variables & facts
  - Write playbooks that use variables to simplify management of the playbook and facts to reference information about managed hosts.
- Manage task control
  - Manage task control, handlers, and task errors in Ansible Playbooks.
- Deploy files to managed hosts
  - Deploy, manage, and adjust files on hosts managed by Ansible.
- Manage large projects
  - Write playbooks that are optimized for larger, more complex projects.
- Simplify playbooks with roles
  - Use Ansible roles to develop playbooks more quickly and to reuse Ansible code.
- Troubleshoot Ansible
  - Troubleshoot playbooks and managed hosts.
- Automate Linux administration tasks
  - Automate common Linux system administration tasks with Ansible.
